

Glassfish Olive

Ambassis agassizii

General Appearance

The Olive Glassfish is a deep-bodied semi-transparent fish with very large eyes and dark edge scales. They can grow to about 7.5cm.

Water parameters

Olive Glassfish fare well in an aquarium with a pH of about 7.0 and a general Hardness of 150—220 ppm.

They require a temperature of 15—28°C

Origin

This **Australian Native** used to be found quite commonly in Victoria, New South Wales and Queensland. In recent years they have suffered a decline in numbers. Wild populations of olive glassfish are now only found in a few sites in the Darling River system.

Temperament

Olive glassfish should be kept as a small school and should not be mixed with large or aggressive species.

The fish commercially available now have been cultured on farms.
