

Broad Leaf Chain Sword

Echinodorus grisebachii

Natural Range

Central and South America

Maximum Size

30-40cm

Water Quality

- Temperature: 22°C - 26°C.
- pH: 6.8 – 7.2
- General Hardness: 100 - 150 ppm

Lighting

Medium-High

Foliage

Large Pointed

Recommended Tank Position

Midground to Background

Growth Speed

Slow

Ease of Keeping

(1 = easy, 5 = difficult)

1

Planting Instructions (Boxed AI Naturals Plant)

- Take the plants from the bag
- Carefully remove all the jelly by washing under a tap
- Individually plant into substrate, taking care to only bury the roots

General Information

With its striking large, pointed leaves, the Broad Leaf Chain Sword is an excellent solitary feature plant for your aquarium.

For best results, ensure it is planted in a bright location, with plenty of surrounding free space. This plant does not require stable water conditions, so we recommend regular testing.

In smaller aquariums, plant in a sand only base. This will ensure that it does not grow too large. In larger aquariums, be sure to plant in a nutrient rich substrate such as gravel.

An ideal plant for a community tank, Broad Leaf Chain Sword is part of the Aquarium Industries Naturals Range.
