

# Brown Wendtii

*Cryptocoryne wendtii*

## Natural Range

Sri Lanka

## Maximum Size

20-25cm

## Water Quality

- Temperature: 22°C - 26°C.
- pH: 6.8 - 7.2
- General Hardness: 100 - 150ppm.

## Lighting

Medium

## Foliage

Long Pointed

## Recommended Tank Position

Midground to Background

## Growth Speed

Slow

## Ease of Keeping

(1 = easy, 5 = difficult)

2

## Planting Instructions (Boxed AI Naturals Plant)

- Take the plants from the bag
- Carefully remove all the jelly by washing under a tap
- Individually plant into substrate, taking care to only bury the roots

## General Information

Brown Wendtii is a decorative aquarium plant, featuring long, brown leaves. It looks best when grown in a bunch in the mid to background area of a tank.

This undemanding plant will tolerate varied water conditions, and is an ideal beginners aquarium plant. It is very well suited to community tanks.

Reproduction occurs quickly once this plant is settled. It will send out runners, and eventually form a dense community. Allow enough space for this to occur.

Brown Wendtii is part of the Aquarium Industries Naturals Range.
