

# Iodi +

provides the iodine needed for coral development and colouring.  
The product enables them to adapt to lighting variations and to combat bleaching.

**PACKAGING**

- **Nano Range,** Aquarium from 0 to 120 l (0 to 30 US gal)  
*Blister of 4 vials*
- **Standard Range,** Aquarium from 120 to 1 000 l (30 to 250 US gal)  
*Box of 6, 12, 30 vials*
- **Pro Range,** Aquarium from 1 000 & more (250+ US gal)  
*Box of 10 vials*

Iodine is an essential element and is vital for coral development in closed reef tank environments. However, it is rapidly consumed by the invertebrates and eliminated by the skimmer, the active carbon, the filter and the coralline algae.

IODI+ supplies the hard corals in your aquarium with the iodine they need to grow and for colouration. It also helps them to adapt to lighting variations and neutralises the excess oxygen produced by zooxanthellae under excessive lighting and therefore combats coral bleaching.

IODI+ is also particularly recommended for Xenia, Anthelia, Clavularia and corallimorphs.

## DOSAGE FOR EACH PRODUCT

- **Nano Range :**  
*1 vial for 60 l (15 US gal) /15 days*
- **Standard Range :**  
*1 vial for 200 l (50 US gal) /15 days*
- **Pro Range :**  
*1 vial for 2 000 l (500 US gal) /15 days*
